

ExpressYard™

Car Repair Billing

Core Capabilities

- Central back office system for railcar repair shops
- Captures repair data & calculates billing
- Uses wireless handheld devices to capture data in field
- Manages inventory & part control process
- Provides regulatory compliance: Early Warning, EHMS and CEPM
- Produces car owner repair invoices

Differentiating Features

- Audits repair lines against predefined audit rules
- Scans inventory barcodes & associating them with repair data
- Scales to handle operations of any scale from single shop to Class I
- Integrates with Railinc data feeds

Optimized Outcomes

- Processes more than 600,000 repairs for 70% of North American railcar repair shops
- Increases bottom-line productivity by simplifying the repair shop entry and billing process

Boost productivity and fast-track your operations with streamlined railcar repair.

The relentless pressure of high productivity, industry regulations and increasing customer expectations means there's little room for error and inefficiency when it comes to railcar repair operation.

ExpressYard Car Repair Billing is a software solution designed to help railcar repair organizations simplify and manage billing and maintenance operations, and ensure regulatory compliance. With the benefit of timely data, enhanced management information and powerful decision-making tools, you can streamline and integrate your operations from better managing freight car repair billing, parts inventory and employee labor hours to early warnings and maintenance advisories for railcars.

The result? Enhanced operational efficiency through a single, integrated solution designed to manage all aspects of operating a railcar repair shop. Increased bottom-line productivity. And reduced repair and maintenance costs system-wide.
