

Pascal Schweitzer, Vice President, Global Services Organization, GE Transportation

Pascal Schweitzer is the Vice President of Global Services Organization for GE Transportation. In this role, he is responsible for improving critical customer outcomes in the areas of product reliability, asset utilization, velocity, fuel consumption, operating expenses and railcar dwell time. His organization oversees maintenance agreements for part sales, asset maintenance, global remanufacturing, fulfillment and the development of advanced software and analytics.

He previously served as Power Services Leader for Europe and was responsible for developing and delivering a regional services strategy, while leading the company's transformation following the acquisition of Alstom. Prior to this, he ran the Gas Turbine Service business for Alstom globally. Before joining Alstom, he was the strategy manager in charge of strategy and IPO projects at Rexel in Paris.

Pascal received a master's degree with specialization in finance from the HEC Business School in Paris.
